

Planting a plant

	Full adult support needed	Some adult support needed	Step completed independently
Collect equipment needed			
1. Put on your gardening gloves			
2. Add a handful of small stones to the bottom of the plant pot, just enough to cover the bottom			
3. Put soil or compost, into the pot, fill half the plant pot			
4. Remove flower from plastic holder			
5. Place the flower in the middle of the pot			
6. Fill the pot around the flower with the compost			
7. Push down the compost around the flower with your hands			
8. Water your flower			

What went well?

Next time, it would be even better if:
