

Personal and Social Development

Environmental Awareness- Level 1

Students can use the internet and can have spelling/writing support to complete this unit.

This is an entire unit of work that I normally cover with other activities over a 6-week term, so only complete what you think will be expected for the time you have off.

Name:

Date:

Module: Environmental Awareness
Development Activity 7

EA Dev7

Definition Cards

*Cut and stick
the correct word with
the correct definition - you can
use the internet to help
you!*

Deforestation	Using items again rather than throwing them away
Environment	Increase in the Earth's temperature
Reusing	Destruction of the world's forests
Pollution	Layer of gases in the atmosphere that absorb harmful UV radiation
Global Warming	Substances that contaminate the environment (land, air and water)
Ozone Layer	A naturally occurring raw material that can be replenished
Renewable	The area in which something lives
Sustainable	Managing resources so they do not run out
Acid Rain	Using materials more than once so that less rubbish is created
Recycling	Rain water that has become contaminated by air pollution
