

# 7Bd/4 Pregnancy

Name \_\_\_\_\_ Class \_\_\_\_\_

- 1 Fill in the missing words in the sentences below.  
Use the words in the box.

bag of fluid	carbon dioxide	cord	oviducts	fertilisation
placenta	oxygen	sperm cell	uterus	

When a \_\_\_\_\_ joins with an egg cell, this is called \_\_\_\_\_. It happens in the \_\_\_\_\_. This is the start of a new life. The developing baby grows inside the \_\_\_\_\_ surrounded by a \_\_\_\_\_.

The developing baby is attached to the mother by the \_\_\_\_\_.

At the end of the cord is the \_\_\_\_\_. This takes food and \_\_\_\_\_ from the mother's blood to give to the developing baby. Waste materials, like \_\_\_\_\_, are sent back to the mother here.

- 2 Draw lines from the diagram on the left to the correct name and then to the correct job.

**Name**

**Job**

Bag of fluid

carries oxygen, food and waste between mother and baby

Placenta

takes oxygen and food from the mother's blood

Cord

protects the baby
