

## Kids Meet Up for First International Amputee Football Camp

By Henry

Amputee football is a sport played with seven players on each team. Outfield players have different disabilities such as two hands but one leg and goal keepers can have two feet and one hand.

It is run by proper coaches and gives children a chance to learn new skills.

This is the first amputee club.

People came from all over Europe to attend.

When the kids interviewed said the game made them feel good as they were able to play football again.
